

Remote Control User Guide

dish
NETWORK®

Reference Tables

Write down your remote address, channel numbers/inputs, TV, VCR, DVD player, and stereo equipment codes as you program them for future reference.

Remote Address

Channel or Input for Satellite Programming

If you enter a “1” as the last number of your code, your remote is in Limited Mode (see page 3 for more details).

TV Code

(Optional)

VCR/DVD Player Code

(Optional)

Auxiliary Equipment Code

(Optional)

To read out your remote codes, see page 8 for instructions.

Refer to page 9 for detailed instructions on Learning

Refer to page 11 for detailed instructions on System Wizard

1 Install the Key Correctly

Note: If you will be using the blue TV2 key that comes already installed in your remote, skip this step and proceed with the next step (*Insert the Batteries*).

1

Pull the remote battery cover off.

2

Separate the key from the remote by inserting your thumbnail or a coin in the crease. Remove the key by grasping at the bottom.

3

Insert the key face up and slide into place.

4

Change the **UHF/IR SWITCH** to IR

2

2 Insert the Batteries

1

Insert 4 AAA batteries, making sure to match the plus (+) ends with the plus markings on the battery case.

2

Replace the remote battery cover.

3

Making the Remote Work With Your Receiver

1

If you installed this key, continue with **step 2** on this page.

2

Verify the UHF antenna is installed on the back of the receiver. Verify the UHF/IR Switch is set to UHF.

4

Confirm that you see the System Information screen.

If you installed this key, go to [page 14](#) inside this guide.

3

SYSTEM INFO

Turn your receiver and TV on, and press SYSTEM INFO on the front of the receiver.

5

Press RECORD on your remote. The remote address will probably change on the screen.

6

Confirm that your remote operates your receiver by pressing remote buttons. If your remote has a blue number 2 key, you may need to go to your remote TV2 location to confirm your remote operates your receiver. If this is not working, go back to **step 5**.

Program the Remote to Control Your TV

To program the remote control to operate a TV, you can enter an Equipment Code (see instructions on page 3).

Or, follow the steps below to scan the database of all Equipment Codes.

Or teach your remote the commands for your TV (see instructions on page 9).

Turn your TV on.

Press & hold the TV Mode button until all Mode buttons light up.

Press POWER.

Press the UP ARROW on the remote repeatedly (1 press per second) until your TV turns off.

Press POUND.
The TV Mode button will flash three times.

Press the POWER button to turn the TV on and try other buttons to make sure the code works. If you want to try another code, start over from step 1.

Programming the Recover Button for TV2 Operation

For TV2 Remote Controls on
DISH Player-DVR 522, 625, 942
and ViP222, VIP222k, ViP622 DVR,
ViP722 DVR, ViP722k DVR Receivers

Programming your RECOVER button allows you to easily regain satellite programming if you accidentally change TV channels or inputs.

Press & hold the TV Mode button until all Mode buttons light up.

Press STAR.

Enter the channel number you tune your TV to when you watch satellite programming.

4

Press POUND.

Use the RECOVER button as described in *If You Lose Your Picture* on the next page (C-6).

Placing Your Remote in Limited Mode

Limited Mode locks out all the TV mode operations except for TV power, Mute, and Volume. This prevents you from accidentally tuning away from satellite programming.

1

Press & hold the TV Mode button until all Mode buttons light up.

2

Press the PAGE UP button.

3

Press POUND.

To take the remote out of Limited Mode, use the PAGE DOWN button instead of the PAGE UP button in step 2.

If You Lose Your Picture (How to Use the RECOVER Button)

Use the RECOVER button to get back to watching satellite programming if you accidentally change channels or inputs on your TV.

1

Press and hold RECOVER until all mode buttons light up.

2

If you see the System Information screen, proceed to step 4. Otherwise, continue to step 3.

(Your screen may be different)

3

Press RECOVER again & wait until the mode lights stop flashing. If you see the System Information screen, go to step 4. If not, repeat this step until you do.

4

Press SELECT to resume watching TV.

Remote Operation

SAT Mode

To use the features described in this section, make sure you are in SAT mode by pressing the SAT Mode button.

Note: Some features may not be available depending on your receiver model.

Volume & Mute Buttons

Control TV volume
Programming required (see C-4)

Press this button for SAT Mode

Receiver Power & TV Power

Top button turns the receiver on/off,
Bottom button turns the TV on/off
Programming required (see C-4)

Input
Press once for Input,
Press and hold for Recover

Receiver Menu
Access receiver features and settings

Remote Operation

TV Mode

To use the features described in this section, make sure you are in TV mode by pressing the TV Mode button. 

Remote programming is required. See C-4 for instructions.

Note: If you have programmed the remote in Limited Mode (C-6), only the TV Power, Mute and Volume buttons will control your TV.

Note: Remote operation is different on DISH Network TVs. See your DISH Network TV User's Guide for proper operation.

Remote Operation

DVD Mode

To use the features described in this section, make sure you are in DVD mode by pressing the DVD Mode button. You can use this mode to operate your VCR instead of a DVD player. Remote programming is required. See page 2 for instructions.

REMOTE CONTROL OVERVIEW

Use this full-function remote control to operate the ViP®722k DVR and ViP222k DISH Network receivers. Also, you can program the remote control to operate most of the popular brands of audio/video equipment like a TV, a DVD player (or VCR), or a second DISH Network satellite receiver. See *Programming for Other Equipment* on page 2.

Note: This remote control may have features not used by your receiver.

USING THE GUIDE

This guide makes it easy to set up and use your remote control. By now you've noticed that the cover contains information on quick set up and remote control operation.

The rest of the guide contains in-depth information to help you get the most from your remote control, including controlling other equipment like TVs, VCRs, and DVD players.

REMOTE CONTROL MODES

Use the remote control's mode buttons to set the remote to the correct mode for the equipment. Be sure to program the remote control to operate the other equipment as described on page 2.

SAT Mode

TV Mode

DVD Mode

VCR
DVD Player

AUX Mode

Great Idea: Whenever you finish using other equipment (TV, DVD, VCR, etc.) be sure to put the remote back in SAT mode.

To change the mode, press the button for the equipment you want to control. The mode button lights for three seconds to show you've set the remote to that mode.

If you program the remote control to operate other equipment, refer to the following for remote-control operation instructions:

- TVs, page C-8.
- DVD players and VCRs, page C-9.
- Other DISH Network satellite receivers, page C-7.
- Stereo equipment (for example, an audio amplifier programmed in AUX mode) uses only these buttons: **SELECT** (to change inputs), **MUTE**, **VOLUME**, and **POWER**.

HOW THE REMOTE COMMUNICATES

Depending on how the remote is set up, the remote control may use UHF radio signals, IR signals, or both to control the receiver. However, only IR signals are used to control other equipment.

- IR signals travel short distances (up to 40 feet), and cannot go through walls or other solid objects. Point the remote control directly at the equipment you want to control, with no objects to block the signal path.
- UHF signals travel long distances and can go through walls and other solid objects. Because these signals travel so far, the receiver may respond to signals from other nearby remote controls. To handle this problem, you may want to change the remote and receiver addresses (see page 13).
- If you're set up to use UHF, make sure that the UHF remote antenna is attached to the receiver's back panel **REMOTE ANTENNA** input so it can receive the UHF remote signals.

PROGRAMMING FOR OTHER EQUIPMENT

Page C-4 shows you how to program the remote control to operate a TV. The following section uses a different method to program the remote control to operate a TV or other equipment (such as a DVD player or VCR, tuner, amplifier, audio receiver or a second TV). You can program the remote control by either following the instructions in *Programming Using Equipment Code Tables* on page 3, or the *Scanning for Equipment Codes* procedure described on page 5.

COMBINATION EQUIPMENT (FOR EXAMPLE, TV/DVD)

When programming the remote control to operate combination equipment, such as a TV/DVD or a TV/VCR, program the remote control in one mode, and then repeat the procedure in the other mode. For example, to program the remote control to operate a TV/DVD

player using code 765, follow the instructions to program the remote to operate the TV using code 765, and then repeat the instructions for the DVD using the same code. Put the remote in TV mode to use TV functions, or DVD mode to use the DVD player (or VCR) functions.

LIMITED MODE

You can program your remote control in Limited Mode to keep from accidentally changing the channel on your TV or VCR. When you use the remote control to operate your TV in Limited Mode, you will only be able to use the **POWER**, **MUTE**, and **VOLUME** buttons to operate your TV. Also, when you use the remote control to operate your VCR in Limited Mode, you will only be able to use the **POWER** and **VCR** function buttons. The section *Programming Using the Equipment Code Tables* has a step that tells the remote control to go into Limited Mode. Also, a quick way to put the remote in Limited Mode is described on page C-6.

Note: Limited Mode cannot be used with audio amplifiers.

PROGRAMMING USING EQUIPMENT CODE TABLES

You can set up the remote control to operate other equipment using the code-table listings that start on page 17 and the modes as shown on page 1. To control a receiver in AUX mode, see page 7.

Instructions	Additional Information
1 Turn the equipment on.	Use the equipment's front panel buttons or its own remote control.
2 Find the brand name of the equipment listed in the code tables that start on page 17.	If the brand isn't listed in the tables, see <i>Scanning for Equipment Codes</i> on page 5.
3 Press and hold the mode button for the equipment until all the other mode buttons light up, and then release the button. The mode button flashes.	For example, hold the TV mode button for a TV until all of the other mode buttons light. When you let go, the TV mode button will be flashing.

Instructions

Additional Information

-
- | | |
|--|--|
| <p>4 For AUX mode only. Press 0 for a second TV, or 1 for a second DVD/VCR, or 2 for a tuner, amplifier, or audio receiver.</p> <p>5 Enter one of the three-digit equipment codes from the table using buttons on the number pad.</p> <p>6 If you want to program Limited Mode, press 1. If not, skip to step 7.</p> <p>7 Press POUND (#).</p> <p>8 Press POWER to turn off the equipment. If the equipment does not turn off, go to step 10.</p> <p>9 Turn the equipment back on and try some other buttons to make sure they work. If the code works for other buttons, stop here.</p> <p>10 If the code doesn't work, repeat steps 3 through 9 with another equipment code listed in the tables.</p> <p>11 If you can't find a code that works, try the instructions that follow for <i>Scanning for Equipment Codes</i>.</p> | <p>This step is for programming the kind of equipment that should be programmed in AUX mode. If you're not programming in AUX mode, skip to step 5.</p> <p>The three-digit equipment code should be for the brand name of your equipment that you found in step 2.</p> <p>See <i>Limited Mode</i> on page 3 for more information.</p> <p>If you entered the code correctly, the mode button flashes three times.</p> <p>If the code you entered works, the equipment should turn off.</p> <p>For example, sometimes POWER works when other buttons don't. Note that more than one code may work to turn equipment on or off.</p> <p>Try every code listed for your brand until one works for your equipment.</p> |
|--|--|

SCANNING FOR EQUIPMENT CODES

Instructions	Additional Information
1 Turn the equipment on.	Use the equipment's front panel buttons or its own remote control.
2 Press and hold the mode button until all the other mode buttons light up, and then release the button. The mode button flashes.	For example, hold the TV mode button for a TV until all of the other mode buttons light. When you let go, TV will flash.
3 <i>For AUX mode only.</i> Press 0 for a second TV, 1 for a second DVD/VCR, or 2 for a tuner, amplifier, or audio receiver. Then press the STAR (*) button.	This step is for programming the kind of equipment that should be programmed in AUX mode. If you're not programming in AUX mode, skip to step 4.
4 Press POWER.	This puts your remote control in its code scanning mode.
5 Press either the UP or DOWN ARROW repeatedly until the equipment turns off.	As you press the UP or DOWN ARROW, the remote tries each code in the memory to see if it can turn off your equipment. When the equipment turns off, you have found a code that might work.
Note: The mode button for the equipment will flash rapidly eight times when you've scanned through all the codes for that equipment.	6 Press POUND (#).
	The mode button flashes three times if you have entered the code correctly. This stores the code that you found.

Instructions

Additional Information

-
- | | |
|---|--|
| <p>7 Turn the equipment back on and try some other buttons to make sure they work.</p> <p>8 If necessary, repeat this procedure until you've tried all the codes.</p> | <p>Press POWER to turn the equipment back on. Try some other buttons to make sure they work. Sometimes POWER works when other buttons don't, and more than one code may work to turn equipment on or off.</p> <p>You may need to repeat the scan to find the best code for your equipment.</p> |
|---|--|

SWITCHING BETWEEN TV AND AMPLIFIER VOLUME CONTROL

When the remote control is set up to operate your TV, the MUTE and VOLUME buttons will adjust your TV volume. To use the remote to adjust the volume of a remote-controllable audio receiver or amplifier instead of adjusting the TV's volume setting, use the steps in the left column of the table. To switch back to controlling the TV's volume, use the steps in the right column of the table.

Control Amplifier Volume

Control TV Volume

-
- | | |
|---|--|
| <p>1 Press and hold the AUX mode button until all mode buttons are lit, then release it. The AUX mode button will blink.</p> <p>2 Press the POUND (#) button.</p> <p>3 Press the plus (+) side of the VOLUME button.</p> <p>4 Press the 0 number button.</p> <p>5 Press the POUND (#) button. The AUX mode button flashes three times.</p> | <p>1 Press and hold the TV mode button until all mode buttons are lit, then release it. The TV mode button will blink.</p> <p>2 Press the POUND (#) button.</p> <p>3 Press the plus (+) side of the VOLUME button.</p> <p>4 Press the 0 number button.</p> <p>5 Press the POUND (#) button. The TV mode button flashes three times.</p> |
|---|--|

Control Amplifier Volume

Control TV Volume

MAKE SURE THE REMOTE CONTROLS THE AMPLIFIER'S VOLUME IN OTHER MODES:

- 6** Press the SAT mode button.
 - 7** Press the plus (+) and minus (-) sides of the **VOLUME** button.
 - 8** Your tuner/amplifier's volume changes and the **AUX** mode button lights instead of the **TV** mode button.
- 6** Press the SAT mode button.
 - 7** Press the plus (+) and minus (-) sides of the **VOLUME** button.
 - 8** Your TV's volume changes and the **TV** mode button lights instead of the **AUX** mode button.

PROGRAMMING THE REMOTE TO CONTROL A SECOND RECEIVER IN AUX MODE

If you have another DISH Network receiver installed, you can use this remote control in **AUX** mode to operate it along with your new receiver. When you program the remote control to operate the other receiver, the remote will send IR signals to that receiver, so the line of sight to the second receiver must be unobstructed. You can program the remote control to operate any other DISH Network receiver, *except* for:

- TV2 on DISH 322, DISH Player-DVR models 522, 625, and 942, ViP222, ViP222k, ViP622 DVR, ViP722 DVR or ViP722k DVR
 - DishPlayer 7100/7200
- 1** Turn on the other receiver and open the System Information screen. (For help opening the System Information screen, refer to the user guide for the other receiver.)
Write down the TV2 address shown: _____
 - 2** Press and hold the **AUX** button until all the mode buttons light up, and then release the button. The **AUX** button flashes.
 - 3** Use the **NUMBER PAD** on the remote control to enter a 3, followed by the address you wrote down in step 1.
 - 4** Press **POUND (#)**. The **AUX** button blinks three times.
 - 5** Press **RECORD** to verify that the address in the remote control now matches the address for the receiver.

READING OUT CODES

These instructions explain how to check the remote control code you put in the remote control when you set it up. Be sure to write them in the spaces provided on the inside back cover.

Instructions	Additional Information
<p>1 Press and hold the mode button for the equipment you want the remote control to operate. When all the mode buttons light up, release the button—the selected mode button should now be flashing.</p>	<p>For example, hold the TV mode button for a TV until all of the other mode buttons light. When you let go, the TV mode light will flash.</p>
<p>2 Press the POUND (#) button <i>twice</i>. The mode button flashes the number for each digit of the equipment code, with a pause between the groups of flashes. A quick flash is for zero.</p>	<p>For example, if the code is 570, the mode button flashes five times, pauses, flashes seven times, pauses, and flashes once quickly.</p>
<p>For AUX mode, the first group of flashes tells you what the AUX mode controls, then the following flashes tell you each digit of the equipment code. A quick flash (zero) before the three-digit code is for a TV; one regular flash is for a DVD player or VCR; and two flashes is for a tuner, amplifier, or audio receiver.</p>	<p>For example, if the TV code is 570, the AUX mode button flashes once quickly (indicating the AUX equipment is a TV), pauses, flashes five times for the first digit of the code, then pauses, flashes seven times for the second digit of the code, pauses again, and flashes once quickly for the final digit (zero) in the code.</p>
<p>For another satellite receiver programmed in AUX mode, the group of flashes tells you the second receiver's address number.</p>	<p>For example, if the AUX mode button is set to control a satellite receiver with address 5, the AUX mode button flashes five times.</p>

LEARNING FROM ANOTHER DEVICE'S REMOTE

After you have programmed your DISH Network remote to control your equipment (in TV, DVD or AUX modes), you may find not all of the commands used by the equipment's original remote controls function as you expect. The learning function of your DISH Network remote control can support these commands.

The remote control can learn commands in two ways:

- 1 You can follow the instructions for using equipment codes to program a specific mode, and then learn commands that add new or overwrite existing functions of the remote control's buttons in this mode. For this type of learning, any button without a learned command keeps the previous command (if any) for that equipment code.
- 2 Each button on this remote learns a command from the equipment's original remote control. For this type of learning, any button without a learned command will have no function for that equipment.

To "teach" your DISH Network remote control specific commands for your equipment, complete the following:

- 1 Ensure the DISH Network remote control is programmed to the desired remote address (see *Changing the Remote and Receiver Address* on page 13).
- 2 Place both your DISH Network remote and the original equipment's remote control on a flat, stable surface.
- 3 On the DISH Network remote, press and hold the mode button for your equipment for about three seconds until all the mode buttons light up, and then release it. Your selected mode button will blink.
- 4 To start learning commands for this mode:
 - If you've found a code for that equipment, first program the code using the instructions for *Programming Using Equipment Code Tables* on page 3 or *Scanning for Equipment Codes* on page 5. Press and release RECALL, then hold the RECORD button for about three seconds until the mode button is lit again. The button remains lit while learning.
 - If you have not programmed a code for that equipment, press and hold the RECORD button for about three seconds until the mode button is lit. The button remains lit while learning.

- 5** Point the front of the original equipment's remote to face the small square (IR window) on the front, left-hand side of DISH's remote, as shown below and on page C-1.

- 6** On the DISH Network remote, press the button you want to teach.
- 7** On the original equipment's remote control, press and hold the button you want learned. If the DISH Network remote learns the command, the mode light blinks off and then back on. If the mode light blinks three times or remains lit, the DISH Network remote did not learn the command. You may need to press the button on the original remote several times for the DISH Network remote to learn the command.
- 8** After a button has learned a command successfully, repeat step 6 and step 7 until all commands you want have been learned.
- 9** To end the learning sequence:

- Press one of the mode buttons on the DISH Network remote. This saves all the commands for that mode, and exits learning to return to normal remote control operation.
- If the remote runs out of memory for learned commands, it saves the commands you have learned for equipment in this mode, exits learning and returns to normal remote control operation. The DISH Network remote cannot learn additional commands.

- If the remote control batteries are too low for learning, all the mode buttons blink quickly eight times. Learning ends **without saving learned commands**, and the remote returns to normal operation. Change the batteries.

- To cancel learning, do not press any buttons on either remote control for at least 30 seconds. The DISH Network remote control times out and returns to normal operation.

Note that **no learned commands are saved** if the DISH Network remote control times out before completion.

USING THE SYSTEM WIZARD

By pressing and holding the 0 (zero) key on the DISH Network remote control for TV1 (or for TV2, if you have set it to **IR only**, as on page 14), you enter the System Wizard, viewable on TV1 (see page C-1).

The System Wizard can help you diagnose certain problems you may be having with your DISH Network remote control, including:

- *Remote Is Not Recognized*
- *Adjust Remote Configuration*
- *Resolve Address Conflict.*

REMOTE IS NOT RECOGNIZED

The remote may not be immediately recognized by your receiver.

If you select Continue, the wizard tries to configure your receiver and remote control to work together.

ADJUST REMOTE CONFIGURATION

You may see a screen asking you to adjust the physical configuration of the remote control.

Configure the remote key (see page C-2) and the UHF/IR switch (see page 14) as shown on the screen, and then select Continue.

RESOLVE ADDRESS CONFLICT

You may also see a screen noting that your remote control is not set to the same address as your receiver.

Select Continue on this screen and the wizard will attempt to resolve the address conflict between the remote control and the receiver.

DISCRETE CODES FOR LEARNING REMOTES

Discrete On and Off IR-only remote-control commands are used by installers when programming macro commands into universal remotes. Using an On-only or Off-only command is more effective than a toggle On/Off command when trying to ensure the satellite receiver is reliably in one state or the other. To use discrete power commands, ensure you have set the UHF/IR switch in the remote to **IR only**, as on page 14) and complete the following:

- 1** Program the DISH Network remote to the desired remote address (see *Changing the Remote and Receiver Address* below).
- 2** Hold the SAT mode button until all mode buttons light, then release the button.
- 3** Press the POWER button (not TV POWER).
- 4** Press VOLUME UP for discrete power on, or VOLUME DOWN for discrete power off.
- 5** Press any other button when you are done to end this procedure.

AVOIDING REMOTE CONFLICTS

When your remote control sends UHF signals, you may experience interference from other nearby remote controls. The instructions in this section describe how to avoid such remote-control conflicts.

CHANGING THE REMOTE AND RECEIVER ADDRESS

One quick way to avoid remote-control conflicts is by changing the address on your remote control and receiver. If you notice that your receiver is changing channels or opening menus, but you're not using the remote control, a quick change of address should fix the problem.

- 1** Press SYSTEM INFO on the receiver's front panel. The **System Information** screen displays and shows the **Primary Remote Address** (for TV1, typically using IR) and the **Secondary Remote Address** (for TV2, typically using UHF).

Write down the TV2 remote address shown: _____

- 2** Press and hold SAT on your remote control for about three seconds, until all of the mode buttons light up, and then let go of SAT.
- 3** Add one to the address that you wrote down in step 1, and use the NUMBER PAD to enter that number (between 1 and 28).

- 4** Press POUND (#). If you entered the address correctly, the SAT button will flash three times. Write down the number you entered in the space provided on the inside back cover of this guide.
- 5** Press RECORD. Make sure the **Secondary Remote Address** you see on the **System Information** screen is the same as the one you entered in step 3. If it isn't, the remote control cannot operate the receiver. Press RECORD a second time.
- 6** Select **Done** to close the **System Information** screen.

Note: This remote control may have features not used by your receiver.

CHANGING BETWEEN UHF AND IR USING THE UHF/IR SWITCH

All receiver models (*except* the ViP222, ViP222k, ViP622 DVR, ViP722 DVR or ViP722k DVR receivers) must use switch position **IR** or the remote will not control the receiver.

Your remote has a switch to change the type of signaling that your remote control uses. It comes preset to the **UHF** position, but if you have a clear line of sight to your receiver, you can change the setting to the **IR** position to eliminate the possibility of any other UHF remote control interfering with yours.

- 1** Remove the battery cover from the remote control.
- 2** Use a small screw driver or a paper clip to carefully change the setting.
- 3** Put the battery cover back on the remote control.
- 4** Use the **SYSTEM INFO** button on the front panel to open the **System Information** screen.
- 5** Press **RECORD** on the remote control.
- 6** Make sure the remote address on the receiver's **System Information** screen shows the correct information:
 - Switch Position **UHF—IR/UHF**
 - Switch Position **IR—IR only**

SETTING UP A TV1 UHF PRO REMOTE FOR THE DISH PLAYER-DVR 522 AND 625 ONLY

Use these special instructions only if you are going to use the green 1 UHF Pro key to control the TV1 side of a DISH Player-DVR 522 or DISH Player-DVR 625.

If you have a DISH Player-DVR 522 or 625:

and want to use UHF Pro with TV1, use this key:

When you are finished setting up the remote control, you'll be able to operate the TV1 side of your DISH Player-DVR 522 or 625 from long distances.

- 1** Make sure the key is installed as described on pages C-1 and C-2.
- 2** Make sure the UHF Antenna is attached to the **REMOTE ANTENNA** input on the back of the receiver.
- 3** Using the receiver's front panel buttons, press **MENU**. Select the following on-screen items in this sequence:
 - a. **System Setup**.
 - b. **Installation**.
 - c. **TV1 UHF Pro Setup**.
- 4** Select **Enable** from the **TV1 UHF Pro Setup** screen.
- 5** Select **System Info** to open the **System Information** screen.

- 6** Use the ARROW buttons to move the highlight to the TV1 remote address (the **Rem Addr** box as shown below). This is important—if you do not move the highlight, your remote control will change the receiver's TV2 remote address (the **Rem Addr** box) and cause your Remote Control 1 to control the TV2 side of your receiver.

Note: Highlight the **Rem Addr** (the lighter area in the graphic above).

- 7** Press the RECORD button on the green TV1 remote control you are setting up. If you get a warning that tells you to pick another address, continue on to the next step. If no warning appears, go to step 12 of this procedure.
- 8** On the remote control, press and hold the SAT mode button for about three seconds, until all the mode buttons light up, and then release the SAT button. The SAT mode button will blink.
- 9** Use the number buttons to enter any number from 1 to 28, *except* for the address shown for on your screen.
Write down the number you entered: _____
- 10** Press the POUND (#) button. If you entered the address correctly, the SAT mode button will flash three times. Press RECORD on the remote.
- 11** Make sure the **System Information** screen shows **UHF** and that this address matches the number that you entered in step 9.
- 12** Select **Done** to close the **System Information** screen. If nothing happens, press RECORD, and then select **Done**.

EQUIPMENT CODES

These tables contain the manufacturer codes for programming the remote control to operate your TV, a DVD player or VCR, or an audio receiver or amplifier. Every attempt has been made to include all codes. If your equipment brand is not listed or if the codes do not work, the remote may not control your equipment. In some cases codes may operate some but not all buttons shown in this guide.

TV CODES

Programming in AUX mode: Use these codes to program in TV mode. If programming a second TV in AUX mode on your remote control, press 0 before entering the TV code.

TROUBLESHOOTING

What's Happening	What's Wrong	What You Can Do
While performing a remote control procedure, the remote control stops working.	If you don't press a button for 20-30 seconds in a programming sequence, the remote shuts off its programming function.	Start over again.
When you press a button on the remote control, the equipment doesn't do what you expect.	<ul style="list-style-type: none"> • The remote may not be in the mode for the equipment you want to control. • The remote control needs to be pointed right at the TV (or other equipment). • The remote control may be missing batteries, the batteries in the remote may be inserted the wrong way, or maybe the batteries are weak or dead. • The remote isn't set up to control the equipment. • No function is assigned in this equipment mode to the button you pressed. 	<ul style="list-style-type: none"> • Press the correct mode button to set the remote to the mode for the equipment you want to control. • The remote control uses IR signals to control all equipment except for the receiver (when using UHF). IR signals travel less than 40 feet, and <i>cannot</i> go through walls or other solid objects. You <i>must</i> point the remote control directly at the front of the equipment, with <i>no</i> objects to block the signal path. • If the batteries are missing or dead, put fresh AAA-size batteries in. If the remote has fresh batteries, check whether you put them in the right way. If you didn't, take them out and put them in the right way. • Make sure you set up the remote to control all the equipment you want to use. See <i>Program the Remote to Control Your TV</i> on page C-4 and <i>Programming for Other Equipment</i> on page 2. • Make sure you follow the steps for <i>Learning From Another Device's Remote</i> on page 9 to teach your DISH Network remote the button function(s) to control your own equipment.
The receiver does things even though you didn't press any remote control buttons.	UHF signals from a neighbor's remote may be controlling your receiver.	See <i>Avoiding Remote Conflicts</i> on page 13 for instructions to correct this problem.
Your picture is snowy (or blue or black).	You have accidentally changed the channel on your TV.	Make sure your TV (and VCR, if one is connected) is tuned to the correct channel. Also try using the RECOVER button as described on page C-6.

What's Happening	What's Wrong	What You Can Do
Your remote control isn't working.	<ul style="list-style-type: none"> • The remote control is in the wrong mode. • You might be using the wrong remote control (TV1 or TV2). • Your batteries are worn out. • The remote control's UHF/IR switch is in the wrong position 	<ul style="list-style-type: none"> • Make sure the remote control is in the correct mode. For example, if you want to use the satellite receiver, put the remote control in SAT mode (see <i>Remote Control Modes</i> on page 1). • Make sure you are using the correct remote control (TV1 or TV2) for your locations (multi-room receivers only). • Change the batteries as described on page C-2. • Check the UHF/IR switch setting as described on page 14. <p> For all receivers <i>except</i> for the DISH Player-DVR 942, ViP® 222/222k, ViP622 and ViP722/722k DVR: leave the UHF/IR switch in the IR position.</p>
When you press the remote control MUTE or VOLUME button, nothing happens.	<ul style="list-style-type: none"> • The remote control may not be set up. • Maybe you're trying to control TV volume, but you set up the remote to control a tuner or amplifier in AUX mode. 	<ul style="list-style-type: none"> • See <i>Programming the Remote to Control Your TV</i> on page C-4 and <i>Programming for Other Equipment</i> on page 2. • Set up the remote control to operate <i>either</i> TV volume <i>or</i> tuner/amplifier volume, whichever you want. See page 6.
Your UHF Pro remote control does not work well from far away.	You may be experiencing interference from objects near your receiver antenna.	<ul style="list-style-type: none"> • Make sure the UHF antenna is connected to the receiver and not touching anything else. • Vary the tilt angle of the receiver's UHF antenna. Locate the UHF antenna tip away from other electronics equipment or metal surfaces, even if separated by wooden shelving. • Move the receiver to different locations. For best results, place the receiver as high as possible, above all other equipment in your entertainment center. • Place the UHF antenna outside the entertainment center by using a coaxial cable to connect it to the receiver. • Move any nearby off-air antenna away from the UHF remote antenna. Do not place an off-air antenna on your receiver.
Your PIP (Picture-In-Picture) button isn't working.	<ul style="list-style-type: none"> • Your receiver doesn't use PIP. • Your receiver isn't in Single Mode. 	<ul style="list-style-type: none"> • Upgrade to a receiver with this feature. • Press the MODE button on the front panel (if available).

LIMITED WARRANTY

This *Limited Warranty* is a legal document. Keep it in a safe place. Remember to keep your *Sales Receipt* for warranty service. We will consider any items you return without a copy of the *Proof of Purchase* to be out of warranty.

This warranty extends *only* to the original user ("you," "your") of the DISH Network remote control and is *limited* to the purchase price of the remote control. EchoStar Technologies L.L.C., formerly known as EchoStar Technologies Corporation, and its affiliated companies ("we," "our," "us") warrant this remote control against defects in materials or workmanship as follows.

For one year from the original date of purchase, if we find the remote control is defective subject to the limits of this warranty, we will replace the remote at no charge for parts or labor. We warrant any such work done against defects in materials or workmanship for the remaining part of the original warranty period.

This warranty *does not cover* installation of the DISH Network System; consumer instruction; physical set up or adjustment of any consumer electronic equipment; remote control batteries; signal reception problems; loss of use of the equipment; unused programming charges due to equipment malfunction; cosmetic damage; damage due to lightning, electrical or telephone line surges, fire, flood, or other acts of Nature; accident; misuse; abuse; repair or alteration by other than our factory service; negligence; commercial or institutional use; improper or neglected maintenance; equipment sold AS IS or WITH ALL FAULTS; equipment removal or reinstallation; shipping damage if the equipment was not packed and shipped in the manner we prescribe; nor equipment purchased, serviced, or operated outside the contiguous United States of America.

REPLACEMENT AS PROVIDED UNDER THIS WARRANTY IS YOUR EXCLUSIVE REMEDY. WE SHALL NOT BE HELD LIABLE FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES FOR BREACH OF ANY EXPRESSED OR IMPLIED WARRANTY ON THIS DEVICE, NOR FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGE RESULTING FROM THE USE OF, OR INABILITY TO USE, THIS DEVICE. UNDER NO CIRCUMSTANCES SHALL OUR LIABILITY, IF ANY, EXCEED THE PURCHASE PRICE PAID FOR THIS DEVICE. EXCEPT TO THE EXTENT PROHIBITED BY APPLICABLE LAW, ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE ON THIS DEVICE IS LIMITED IN DURATION TO THE DURATION OF THIS WARRANTY. WE RESERVE THE RIGHT TO REFUSE TO HONOR THIS WARRANTY IF WE DETERMINE ANY OF THE ABOVE EXCEPTIONS TO HAVE CAUSED THIS DEVICE NOT TO HAVE PERFORMED PROPERLY. THIS WARRANTY SHALL BE VOID IF ANY FACTORY-APPLIED IDENTIFICATION MARK, INCLUDING BUT NOT LIMITED TO SERIAL OR CONDITIONAL ACCESS NUMBERS, HAS BEEN ALTERED OR REMOVED. THIS WARRANTY SHALL ALSO BE VOID IF THE DEVICE HAS BEEN OPENED BY AN UNAUTHORIZED PERSON (with the exception of opening the battery cover).

This warranty gives you specific legal rights which may vary from state to state. Some states do not allow the exclusion or limitations of incidental or consequential damages, or allow limitations on the duration of an implied warranty, so those limitations may not apply to you.

DISH NETWORK'S EXCHANGE PROGRAMS

DISH Network offers two options if you need to replace your remote control; the Advanced Exchange Program and the Post Receipt Exchange Program.

Advance Exchange Program

The Advanced Exchange Program allows you to have a replacement remote shipped immediately to you. Depending upon where you live, the remote should arrive within 3 to 5 business days. You will not have to return your defective remote to DISH Network using this program.

A shipping charge will be applied for shipping the replacement remote. This is a one-time fee based on DISH Network's competitive bulk shipping rates (additional charges may apply outside the continental U.S.). This fee will be charged to your billing account or valid credit card.

Post Receipt Exchange Program

The Post Receipt Exchange Program does require that you send DISH Network the defective remote control at your cost to determine if the equipment is covered under warranty. To provide faster service, upon receipt of your equipment you will be shipped a replacement. Your original equipment will not be available for return.

If your equipment is not covered under warranty and can be repaired, your billing account or credit card will be charged the standard repair fee for the replacement. If damage to the defective equipment is found, which DISH Network in its sole discretion determines has voided the warranty, or makes the equipment unrepairable, your billing account or credit card will be charged the market price of the replacement.

ACCESSORY WARRANTY

An accessory is any DISH Network branded equipment, displaying the DISH Network logo, excluding the receiver, Smart Card, cables and hookups, and non-mechanical components. A one-year warranty becomes effective upon the activation of the DISH system or date of purchase, if bought separately. A proof of purchase is required to verify the purchase date. If an accessory has an expired warranty, no exchange will be issued. You may purchase replacement accessories from DISH Network or your local retailer.

IF YOU NEED HELP

1. Review this *User Guide*.
See *Troubleshooting* on page 31.
2. Call the Customer Service Center at 1-800-333-DISH (3474). Have the date of purchase and your customer account number ready.
 - a. If the representative finds you should return the remote control, you'll get a telephone number to call for a Return Authorization (RA) number. *Before shipping* any equipment to us, you *must* get a Return Authorization number.
 - b. You *must* package returned equipment the right way. Follow the instructions the representative gives you.
 - c. Write the RA number in large, clearly visible characters on the *outside* of the shipping box used to return the equipment.
To avoid confusion and misunderstandings, we will return shipments without an RA number clearly visible on the outside of the box to you at your cost.
3. d. We will:
 - Check the remote control, including whether it is covered under the warranty.
 - Replace any remote we find is defective with a new or refurbished remote, if the defective remote is covered under the warranty. We will ship the replacement remote at our expense.
 - If a defective remote is not covered under the warranty, we will tell you. We may assess you a flat rate charge for a replacement remote, including shipping and insurance.

REGULATORY FACTORS

This device complies with Part 15 of FCC Rules. Operation is subject to the following two conditions:

1. this device may not cause harmful interference, and
2. this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications to this device may void your authority to operate this equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Re-orient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. Consult the dealer or an experienced radio/TV technician for help.
